

## Service cars

Managing your service cars properly is needed to ensure efficiency and safety at your workplace. For smooth operations, it's important that you can easily track and maintain all your service cars, so they are always in the right place and with the right equipment. This is crucial to avoid downtime.

### Global Tracking API

- Monitor the real-time location and status of your service cars on a global map
- Go directly to the inventory of the service car from the map and access all information (equipment status, certificates, expiry dates, etc.)

### Manage Equipment

- See the status of equipment within the service car (green, yellow or red)
- Add or remove specific items, create kits
- Manage Material Safety Data Sheets (MSDS)

### Maintenance

- Put service cars that are out of service or require maintenance into quarantine
- Upload files and certificates
- Track expiry dates
