

Special tools & equipment

Effortlessly monitor all equipment which needs to be serviced, inspected, or handled at different intervals. Track vital components like valves and pumps, ensuring peak functionality, whether in your warehouse or your vendor's. It's important, as these types of equipment need to be rotated or pressurized etc. to maintain peak functionality, especially during long-term storage.

Location & Status

- Bin location (Is the equipment in the desired location)
- Status of your equipment (Green, yellow or red)
- Vertical / horizontal (Check vertical and horizontal storage)

Maintenance

- Expiry dates, Quarantine & Inspection intervals (Plan maintenance, quarantine failures, and customize inspection intervals for tailored operations.)
- Rotate-, Pneumatic- & Oil change sequences (Easily schedule pneumatic actuation sequences, oil change intervals, and quarterly equipment rotations)
- Preservation (Running check preservation status)

Documentation

- File upload (Upload your own files relevant to equipment)
- Certificates (Upload certificates on each item)
- Inspection-, Service- & Calibration reports (Access all reports, including history)
